

TRUMPF Trainee / Graduate Program (f/m/d)

How brave are you? We are a high-tech company providing machine tools and laser technology, and are looking for people who can face new challenges with a fresh mind. As an independent family company, we offer you the freedom and trust to put your brave ideas into practice.

Your role

Our Graduate Program offers you a customized entry into professional life and prepares you for your future career. During a 24-month rotation program, you will get to know the TRUMPF Group through project-related assignments within the Germany and abroad.

You can either choose the generalist Business Talents Program and get to know different departments or specialize in one of the following fields at the beginning of the program:

- IT and Digital Transformation or Software Development (DigITal Sprint)
- Human Resources (Business Talents HR)
- Research and Development (MINT)

An executive will mentor and support you during the program. At the same time, you will establish a network right from the start. Together with the other program participants you will work on various tasks. You will continuously develop your personal skills through shadowings and trainings.

With you on board, we would like to power ahead with the digital networking of the manufacturing industry. Our passion and creative drive ensure that we are an innovative force – across the globe at over 70 TRUMPF locations.

Your profile

- Successfully completed PhD or a very good Master's degree and first working experience
- International experience of at least six months as part of a semester abroad or an assignment
- Willingness to take on responsibility and open mindedness for various job opportunities within the TRUMPF Group
- Experienced communication skills in German and English as well as strong analytical skills
- Ability to work independently and enthusiasm for digital topics and innovations

Interested? Apply now!

The next starting date for the TRUMPF Graduate Program is **April 1, 2020**. The multi-stage selection process begins with an online test. To be considered for the assessment center, we need your application, including your preferred program track, via our career page by **February 2, 2020** at the latest.
